The Pro Series Drop Deck Equipment Trailer takes the stress and danger out of loading and unloading equipment. Imagine pulling up to the job site, lowering your trailer deck to the ground with the push of a button, and smoothly driving your equipment on and off without the hassle of ramps. That’s the kind of convenience and safety this trailer delivers. The hydraulic system lowers the deck effortlessly, eliminating the risks that come with maneuvering heavy equipment up steep ramps. It’s an easier, safer process that helps you get the job done faster.

Engineered with a 7-gauge steel floor, the Pro Series Drop Deck is as tough as they come. The floor is also coated with a slip-resistant finish, ensuring that even on wet or slippery days, your equipment stays secure as you load and unload. This design adds an extra layer of safety, keeping you and your tools protected no matter the weather conditions.
