Price: $9,900.00

MSRP: $11,500.00
Sales Price: $9,900.00

Description

The KAGE System is becoming the most wide-spread, fastest growing, and most effective way to do commercial snow removal with your skid-steer. The benefits of this 2-in-1 tool are simple - speed, speed, and more speed! The Universal Skid Steer Mount is the most common configuration

for the SnowFire System. This couples to any modern skid steer in seconds. Then just couple the hydraulic couplers to the machine auxiliary hydraulics and you are ready to roll snow!
The KAGE system uses the skid-steer boom movement to pick up and drop off the unit in seconds without leaving the cab - no pins, bolts or hinges. Combine angle plowing and snow pushing into one fast and seamless operation. Also available for tractor, back hoe and wheel loader models.
With the KAGE box attached, the trip edge mechanism of the plow still operates normally. You also retain the ability to angle plow and maneuver large quantities of snow to a precise location using the plow hydraulics. These are big advantages over non trip-edge snow pushers.
Kage Claws also available. Snow tires for skid steers raise the bar for efficiency at the job site. Installing KAGE KLAWZ skid steer snow tires will give you ultimate traction and control. We've done side-by-side tests and there's no comparison in performance between conventional skid steer snow tires and the KAGE KLAWZ. Classic scenario! You have always had enough horsepower but never the traction. Kage Innovation has solved the problem by offering a full steel radial snow tire that allows you to maximize the efficiency of your machine with a 2 mph increase in ground speed.
9’ - Was - $10,900 - Now $9,900
10’ - Was - $11,100 - Now $10,100
10' Compact Loader Was $11,700 - Now $10,700
