Description

OVERVIEW

Dump Bed Trailers All of the quality and features you'd expect from Delta along with a box capacity of more than seven cubic yards for the largest model. The hydraulic scissor lift achieves a 45-degree bed angle for smooth unloading every time. The combination rear gate lets you choose whether to empty as a standard dump or swing the split doors out for maximum clearance. The dump bed is reinforced beneath, along the sides, and at the corners to last for many loads. Slide-in ramps make it possible to carry equipment, but stay out of the way when not needed. \
