Price: $7,945.00

Description

This is the package price and INCLUDES our professional installation on most applications
Complete Truck plow Package w/Nighthawk Halogen Headlights
The all-new PRO-PLOW 3 line of straight blade plows offers the first stainless steel straight blade model from Western Products. With limited moving parts and full hydraulic range of motion-these straight blade plows are workhorses that move snow efficiently season after season.

Plow Blade Construction

The rugged moldboard is 29" tall and comes in 14-gauge powder-coated steel or 14-gauge stainless steel in 7'6" or 8' widths for Class 2 and 3 trucks or tractors. The durable blade provides an aggressive 70-degree attack angle for a clean scrape.

Structural Reinforcement

Eight vertical ribs paired with the exclusive POWER BAR provides structural reinforcement for exceptional torsional strength and rigidity to eliminate blade twisting. High-strength steel at the base channel offers added support to the bottom of the plow blade.

RELIABLE HYDRAULICS

We manufacture our own hydraulic components to ensure the highest standards of quality and reliability, so that you get a hydraulics system that's not only fast and responsive, but that's built to last season after season.
Fully enclosed components are protected from the elements.

Trip Protection

The full trip blade uses two springs to protect your plow and vehicle when striking hidden obstacles while plowing. Elastomeric bumpers reduce jarring and soften the blade return when tripping occurs.
For added dampening, shock absorbers are available as an accessory.

Light Bar

Be seen and recognized with the standard, WESTERN red light bar on both stainless steel and powder-coated steel options. Not only does this boost the aesthetic appeal of your snowplow and increase visibility-it also signifies quality, reliability, and professionalism.
