Western Marauder 2.2 Cu. Yd. Extended Chute Auger**Includes Installation

Type	Equipment	**Category**	Salt Spreader
Stock#	BW31420	**Location**	Boothwyn, PA
Year	2025	**Status**	Special Order
Condition	New	**Manufacturer**	Western Products
Model	Marauder 2.2 cy		

https://thehitchmaninc.com/unit/western-marauder-2-2-cu-yd-extended-chute-auger-includes-installation-631811

Price: $9,795.00

Description

THIS PRICE IS FOR THE 2.2 CU. YD and includes our professional installation
Includes: Extended Chute
It's your job to make sure the world keeps moving ... and to do that, you need ice control equipment you can rely on. The all-new MARAUDER stainless steel hopper lineup is engineered to get the job done right. Choose the best material delivery system for your operation based on the de-icer you commonly use ... either the all-new HELIXX shaftless auger for precise rock salt application or the pintle chain conveyor that's perfect for thick, heavy de-icing materials. Whatever choice you make, you'll get the delivery performance you demand.

Polyethylene Construction & Geometry

Resist the corrosive environment of de-icing with polyethylene construction. Lightweight, yet highly durable, these hoppers are built to last. The molded polyethylene tub geometry is optimized for better material flow. This allows for a smoother, even flow that prevents materials from getting stuck.

HELIXX Auger Technology

Patented corkscrew material delivery system is optimized to operate in the target range for rock salt spreading best practices. The auger has multiple pitches to help promote smooth, even material flow from the hopper and prevents bridging. The shaftless technology reduces drag on the motor and reduces the overall load on the electrical system.
** Auger Models Only (P150A & P220A)*

Pintle Chain Conveyor

The large conveyor delivers reliable, smooth, and consistent material flow for heavy, dense materials (like sand and 50/50 mix) while reducing bridging.
** Chain Models Only (P150C & P220C)*

Interlocking Poly Lids

Standard lids have molded channels for moisture runoff. Pockets at the end of the lid allow a 2x4 to be inserted for leverage while opening.

Stand on End

Special design allows the hopper to stand on end for easier storage in the off-season and easier installation into the truck bed. Simply remove the two pins, unplug it, and take off the chute before standing up the hopper.

Extended Material Delivery & Pre-Wet Chamber

A material delivery extension reduces leaking/ spilling during transport and leads into the patented pre-wet mixing chamber. It also provides a cab-forward design for added stability and weight distribution of the hopper.
** Pre-wet accessory sold separately*

Optimized Spinner Channels

The ridges on the spinner ensure an even distribution of material throughout the spread arc. The spinner is 16" diameter and can spread salt up to 36' and sand up to 24'.

Chute Power Plug

Heavy-duty, weather-resistant plug is IP-68 rated. Positive latching ensures a secure connection, even with vibrations caused by consistent travel. The plug has been tested to 5,000 mating cycles for durability for many winter seasons to come.

Swing Away Chute Assembly - MARAUDER Poly

Remove the pin, unplug it, and swing the chute from the the driver's side to the passenger side, providing easy access for maintenance or material unloading. The chute assembly can also be removed for convenient access to the hitch or to stand the hopper up on end during storage.
