Description

The HDV heavy-duty V-plows are built like nothing else on the market. Available in either durable powder-coated mild steel or rust-resistant stainless steel - and with either 8'6" or 9'6" blade widths - the plows boast 16-gauge flared moldboards that are reinforced by two robust angled power ribs. Double-acting angle cylinders, trip-edge protection, adjustable center cutting edges and responsive direct lift round out the many advantages of these feature-packed V-plows. Backed by Snow Ex 2 year warranty!
