Description

Move more snow with a snow plow that thinks for itself - the SPEEDWING 8600 from SnowEx. Intuitive mechanical wings automatically adjust from scoop mode to windrow position as you angle the plow. By combining the ease of straight blade operation with the productivity of a winged snow plow, SPEEDWING clears big jobs fast to enhance your profits. The SPEEDWING is engineered for efficiency, allowing you to shift the plow blade from scoop mode to an optimum windrowing position with the simple push of a button. Scoop mode can carry up to 30% more snow than a straight blade, while a windrowing angle helps complete the job in fewer passes. Backed by Snow Ex 2 year warranty!
