Sales Price: $18,295.00

Description

The unique Air Tow Flatbed uses a totally different concept to make loading easier and safer. The trailer deck remains completely level as it raises and lowers hydraulically in less than 30 seconds. Air Tow adds the advantage of making loading a one man job even in adverse weather conditions and eliminates the need for ramps or a tilt deck. At ground level you simply drive your equipment onto the trailer. Ground level loading is especially useful for equipment with poor traction or low ground clearance. Common uses for the RENTAL-14 trailer include safes, vending machines, skid steers, forklifts, etc.

This Air-Tow model features its unique, exclusive Floating Torsional Rubber suspension system with floating axles mounted in a heavy duty roller bearings. The suspension has a progressive spring rate, the further it is compressed the stiffer it becomes. It is gradually stiffened according to the load being applied by progressively increasing in proportion to the load. The rubber suspension can withstand severe shock loads at maximum capacity without bottoming out which greatly reduces forces transmitted to the trailer frame and cargo.

Features

- Exterior Features
  - D-Ring Installed
  - Powder Coated Paint
  - Steel Floor
- Jack & Coupler Features
  - Manual Jack
  - 2 5/16” Coupler
- Safety Convenience & Electrical
