Steel tubing headache rack with “easy view” window grill

Designed with the best and strongest materials to keep you safe, our “easy view” window grill headache rack not only protects but provides ample room to see when backing up your vehicle.
4? structural steel channel frame rails
Because we don’t use roll-formed runners, our structural 4? channel frame rails are stronger and more durable than any on the market. They also prevent any rusting from the interior of the tube.
30,000 lb.-rated B&W gooseneck hitch with 7-way electrical plug
This is a best-in-class, independently tested gooseneck hitch that handles even your toughest hauls. It also contains a 7-way electrical plug to give you ample choices for your power-driven needs.
4 – Airline track tie-downs
More versatile tie-down points that are stronger throughout the entire hauling process.
Aluminum side rail cap
CM’s better-looking, strong aluminum side rail caps have a more finished approach and longevity that outweigh our competitors.
1/8? steel treadplate deck
This strong and long-lasting deck is designed for heavy-duty work, withstanding the rigorous work conditions that our bodies are placed under. Compare to other bodies on the market, which use 11-gauge and 13-gauge floors.
Aluminum cast insert for LED rear lights and tag
When buying an ER, we know that you are looking for the best-looking, longest lasting materials. That’s why we use cast aluminum housings, which look better and won’t corrode like many of our competitors’ housings.
Modular sealed wiring harness
Our modular sealed wiring harnesses are resistant to corrosion, deterioration and pulling apart, meaning they can withstand the harshest conditions.
7-way round and 4-way flat electrical plug standard on rear tailboard
This standard feature provides quality results and allows you to hook on to any trailer.
24,000 lb.-rated B&W bumper pull hitch
CM’s independently rated bumper pull hitch gives you best-in-class towing capacity, which is integrated into the entire frame.
3? Steel roll-formed 3/16? channel crossmembers
These are the toughest and most durable work truck subframes.
2 – LED recessed tail, brake and backup lights mounted in headache rack
CM’s lights are brighter and use less power than conventional incandescent lights, so your stops, turns, and tag lights will be easily seen and recognized.
4 lockable, flush integrated toolboxes with chrome T-handle twist compression latches
Our recessed tool box doors provide maximum safety in our large boxes to prevent weathering of your tools and equipment. For security, the dual latches lock with a key and padlock loop when desired.

- Beds designed for a RAM Mega Cab will only have two boxes in the rear to accommodate standards on this chassis.

Stainless fenders and aluminum tread plate trim
A durable and better-looking fender that will serve you well on the road. Our stainless fenders will last longer and not corrode.
Angled fuel fill
Provides a shinier, and better-looking feature to your work truck, as well as a no-corrosion zone for all your in-and-out hauls.
