**Description**

The standard 2.5” receiver allows you to add a hitch for bumper pull cargo, and a 2 5/16” gooseneck ball is standard in case you are hauling a heavyweight. Our receivers are lab tested and certified for 18,500 lbs bumper capacity and 30,000 lbs gooseneck capacity.  1/8” Diamond plate flooring will give you a lifetime of duty and both 7 way and 4 way towing plugs make sure you can hook up and go any time. Standard lifetime LED lights ensure you will never be left in the dark, and the tubular steel headache rack will protect your cab from most anything you can throw its way. Standard angled corners help you maneuver into tight spaces and standard exposed rub rail and stake pockets give you plenty of contact points for securing any load. Check out our optional features and build a bed to suit your workload today.

A. Steel Tube Head Rack
B. 1/8” Diamond Plate Floor
C. Full LED Lighting
