At Doolittle Trailers, we understand the importance of durability and longevity when it comes to your trailer's finish. That's why we go the extra mile to ensure that our trailers are prepped and finished with top-quality materials that are built to last.

Each Doolittle trailer is prepped with a two-part Epoxy Primer, providing a strong foundation for the paint to adhere to. We then apply a two-part Polyurethane Paint finish, which has been proven to be more durable than traditional powder coat finishes. This combination of primer and paint not only enhances the appearance of your trailer but also provides superior protection against the elements, abrasion, and corrosion.

With our advanced painting process, you can trust that your Doolittle Trailer is built to handle whatever you throw at it. Whether you're hauling heavy equipment, landscaping materials, or recreational gear, our trailers are tough enough to stand the test of time, ensuring that they look great and perform reliably for years to come.
