Price: $13,540.00

Description

THE ULTIMATE POWERED TILT TRAILER

The T8X powered tilt trailer is perfect for users seeking a fully-featured, easy to use trailer with a full-length tilting bed. Raising and lowering the deck is as easy as activating the hydraulic power unit and letting the trailer do the work! It's even available with a wireless remote for raising and lowering the bed from inside your tow vehicle. The T8X is perfect for hauling equipment with longer wheelbases, tractors with farm implements, or even two small cars.
We build the T8X in 22', 24', 28', and 32'. All T8X trailers feature dual cylinder controls to keep your load balanced.
Width between the fenders on a standard T8X is 83", and we offer the option of rugged drive over fenders for a full-width use of 102". No matter which deck length you choose, we designed the T8X with low loading angles for your safety and convenience.
Two torsion axles come standard on the T8X powered tilt trailer, providing a base GVWR of 16,000 pounds. These torsion axles feature an enhanced warranty over a traditional suspension style and provide a smoother ride and lower deck height.
Integrated steps located at the front and rear of each fender provide easy deck access to check or secure your load. These steps also house high-visibility, long-lasting LED lighting. These ultra-bright LED lights are flush fitting to help prevent damage.
Frames on the T8X powered tilt trailer are made from 6" x 2" x 1/4" tubing with 3" channel crossmembers on 12" centers. This close crossmember spacing creates a stiff deck capable of hauling multiple vehicles or pieces of equipment.
Several different flooring options are available on the T8X powered tilt trailer. From the standard treated wood floor to rough oak, diamond plated steel, or the revolutionary Blackwood rubber infused lumber, you can get a T8X built exactly to your needs.
Like all MAXX-D Trailers, the T8X powered tilt trailer is finished with our industry-leading powder coating process. Six different steps all work together to give your trailer a premium powder-coated steel surface with unmatched durability.
Through our expansive dealer network, we give you the option to configure your T8X powered tilt trailer with a variety of special options to make your life easier. Whether it's a winch plate and winch, different floor style, or hydraulic jacks, you can get a T8X that's perfect for whatever it is you're hauling.
We also offer the T8X in your choice of a bumper pull or gooseneck option. No matter what you need to haul, there's a T8X in a configuration for you. Build something great with a T8X powered tilt trailer!
