Price: $16,499.00

Description

RECHARGED AND STILL LEADING THE WAY.
The all-new Turf Tiger II stands heads and tails above the crowd in power, durability and performance. This industry benchmark has been re-engineered to be as easy on the operator as it is efficient on tough jobs in the field. No matter how challenging the terrain

**and cutting conditions, the Turf Tiger II makes mowing a snap. **
From the heavy-duty, Tri-Plate Velocity Plus(tm) cutter decks to its extra strength double-tube steel frame to the dual 16cc hydraulic pumps and high-torque wheel motors, this cat is ready for action. The Turf Tiger II features the exclusive Command-Comfort Operator Station with adjustable 4-point iso-mounted suspension seat and Quick-Fit adjustable steering control levers to make your time spent in the driver's seat more comfortable and more productive.
With speeds up to 12 mph, huge-horsepower, fuel efficient engine options like the fuel injected Kawasaki or Kohler EFI, massive 37hp Big Block EFI models, or Kubota Diesel models, there's a Tiger II that will increase your productivity and send your competition running for cover! A larger capacity fuel tank and a heavy-duty hydraulic oil cooler, the Turf Tiger II is geared up to take the "hard" out of hard work.
****
Features may include:
Up to 12 MPH forward speeds and 5 MPH reverse speeds keep productivity at a maximum. (10 MPH forward speed on Diesel models)
Heavy-duty hydraulic drive system includes dual 16cc Hydro-Gear pumps and Parker wheel motors for reliable, zero turn maneuverability. Hydro-Gear 16cc hydraulic pumps provide smooth, positive and reliable power to the drive wheels. Extra large input bearing, input shaft and internal components add to reliability and performance. Built-in pressure relief valves reduce internal pressure spikes and add to pump life.
Auxiliary hydraulic oil coolers keep oil temperatures within a safe operating level and adds to hydraulic system component life.
Driveshaft driven cutter deck eliminates belt slip and provides increased reliability and longevity compared to a belt drive system.
Heavy-duty blade drive spindles provide reliable performance season after season. The Scag spindle easily handles the high horsepower and torque requirements of this powerful mower.
Choose a 52", 61" or 72" Velocity Plus(tm) cutter deck. Match that with a Kawasaki DFI , Kohler EFI, Briggs Vanguard or Briggs Vanguard EFI engine. (61" or 71" Kubota Diesel models)
Tri-Plate cutter deck top is incredibly strong. .485" deck top thickness from three separate layers of steel (7ga., 10ga, and 11ga.)
Fuel injected engine options: The Kawasaki DFI (digital fuel injection), Kohler EFI (electronic fuel injection) or Briggs Vanguard EFI are all incredibly powerful and efficient powerhouses. These engines will start easier and are more fuel efficient than carbureted models, reducing overall operating cost.
**Single fuel tank, 12 gallon capacity keeps you in the field cutting grass. Fuel tank is positioned low, in the center of the machine, enhancing the mower's low center-of-gravity and giving it excellent hillside stability. Fill up in the morning and cut all day long. **
