Price: \$13,880.00

Description

The TBWB Series wide body tilt trailer is engineered to provide a hassle-free hauling solution. Designed for both commercial and personal use, this tilt deck trailer eliminates the need for ramps, making loading and unloading more efficient. Its rugged steel construction, high-strength crossmembers, and premium finish ensure durability for years of reliable use. Whether you're transporting construction equipment, vehicles, or heavy-duty machinery, these tilt bed trailers provide the strength and stability needed for any job. Built with convenience and durability in mind, the TBWB Series includes self-adjusting electric brakes for superior stopping power and 17.5" H range 16-ply tires for improved load capacity. The 27" bed height and 82" width between fenders provide a spacious and easy-to-approach loading area, while the 16" crossmember spacing enhances structural integrity. The hydraulically locking tilt system ensures secure operation, and the treated wood decking offers a reliable surface for cargo. Additional features include a rub rail with stake pockets, no exposed wiring, a cold-weather 7-way plug rated for -85°, LED lights for visibility, a 12K spring return jack for easy hitching, a 2-5/16" adjustable coupler for secure towing, and a five-year frame warranty for long-term confidence.
