Description

All Black Rhino Trailer models feature North American tubular construction, Radial Tires, full LED lighting package and standard features that are considered upgrades on many other brands of

trailers. We take pride in building a quality trailer that will endure the rigors of hauling ATV's, UTV's, equipment, vehicles and anything else you can think of. A Black Rhino Trailer is built for the long haul and is easy to maintain and will withstand many years of use, even in the difficult Northern climates.
We offer Landscape/Utility trailers with the traditional perimeter top rail as well as with the popular "Rail Delete" option. Unlike many other manufacturers our "Rail-less" trailers have a stronger main frame structure to give you a trailer with the versatility of a traditional flat deck but with the quality construction you expect.
Most of our trailers utilize a "Wishbone" style tongue/A-Frame design for strength and durability. Our "Full Contact" design means we weld everything! You will see more welds on our trailers because we think a little extra time to fully weld all joints is time well spent.
We use tubular aluminum every place we can on our trailers. You won't find structural components and crossmember built from angle or channel like many other manufacturers. This adds strength to the trailer and provides 4 welds at joints versus 2 or 3 with angle or channel. Black Rhino Trailers are built to last!
