PULL BACK TARP SYSTEM

The D6X is great for homeowners and DIY people that need an easy to maneuver dump they can haul with a half ton truck. We build the D6X on a compact footprint that makes it convenient for a variety of smaller applications, yet still, include heavy duty features like a scissor hoist.
Much like our larger dump trailers, the D6X offers a barn door and spreader gate combo with the option of adding rear slide-in ramps. This is the perfect light duty dump trailer if you're looking for something small that's easy to pull through tight areas of a city.
Our Tuff Sides provide a massive 3" top cap surface that wraps partially down the side of the trailer. These top rails are then supported with flared steel side supports. Combined, they help form a bed that's extremely resistant to warping, dents, and damage. All of our dumps come equipped with tarp kits as a standard feature.
With a standard GVWR of 7,000 lbs and the option to upgrade to 9,990 lbs, the D6X is perfect for tasks where a larger dump trailer is just too big. Despite its size, it still includes a fully-self-contained hydraulic system and a built-in charger.
Just like our full-size models, the D6X light duty dump trailer is Texas made and is finished with our industry-leading powder coating process. Six different steps all work together to give the D6X a premium powder-coated steel surface with the same durability as our larger dump trailers.
