MINI 2-FUNCTION WIRELESS REMOTE

2 5/16" 30K ROUND GN COUPLER

2-10K DROP-LEG JACKS

Designed with real-world input and experience, MAXX-D dump trailers are built with clever designs, superior final finishes, and performance that speaks for itself. We have been making heavy duty dump trailers for a long time, and it shows in our finished products. MAXX-D dump trailers are proven in the harsh conditions of real-world worksites. We're also not afraid to challenge the status quo and test new ground, with innovations like Tuff Sides on every dump trailer we make. The top edges of dump trailer beds are often subjected to regular abuse while loading. Clumsy equipment operators can bang and dent these areas while loading, creating unsightly weak points that can take a toll on the structural integrity of the bed. Tuff Sides solve this issue by wrapping this vulnerable top edge with a rugged 3 cap that extends down the side of the dump trailer. These areas are then further secured by flared steel supports that scale the bed in place. As a result, Tuff Sides make your dump trailer bed extremely warp-resistant and create the ultimate standard in durability.
