The T6X power tilt trailer is a push-button trailer that tilts its full bed, has a GVWR of 14k, a full 83" of space between the fenders, and can be built with a 102" wide deck and driveover fenders for loading wide wheel-based vehicles like dually trucks or rock-crawlers. The T6X 14,000 lb. power tilt trailer is perfect for users seeking a fully-featured, easy to use trailer with a full-length tilting bed. Raising and lowering the deck is as easy as activating the hydraulic power unit and letting the trailer do the work! It's even available with a wireless remote for raising and lowering the bed from inside your tow vehicle. The T6X is an ideal choice for transporting your cars, scissor lift, skid steers, or small forklifts.
