One of the key features of the Equipment Trailer is its 2-foot beavertail, which provides an easier and smoother transition for loading and unloading your equipment. Paired with the spring-assist channel ramps, this trailer makes handling even heavy machinery a more manageable task. The spring-assist ramps reduce the effort needed to raise and lower them, saving you time and energy during the workday.

In addition, the ramps are equipped with adjustable support legs, allowing you to load equipment on uneven or soft ground without worrying about stability. This ensures safer loading conditions in various environments, whether you're at the job site, in the field, or on a slope.

Designed for versatility, the Equipment Trailer can handle a wide range of applications, from transporting compact construction equipment to hauling heavy-duty machinery for agricultural or landscaping projects. Its robust construction and thoughtful design features make it ideal for professionals who need a dependable trailer that can adapt to different tasks.

Whether you're moving tractors, skid steers, or other essential equipment, the Equipment Trailer is built to provide years of reliable service. It combines the traditional functionality of an equipment

trailer with modern enhancements for ease of use, safety, and durability. Whatever the job, the Equipment Trailer is ready to help you get it done efficiently and effectively.

Key Benefits

Full Wrapped C-Channel Tongue

-Provides exceptional structural integrity with increased strength and durability. Also enhances stability of the tongue when under load.

Heavy Duty Drop Leg Setback Jack

-Equipped with a jack that allows for quick and easy unhitching, as well as being located in a position to clear your tailgate.

2? Beavertail and HD 4? Channel Stand-Up Ramps

-Provide an optimal loading angle for safe loading, while the spring-assist features reduces the strain and effort required.

Spring-Assist Ramps with Adjustable Support Legs

-Ensures stable and secure loading in any conditions.

Pressure Treated 2? x 6? Decking

-More resistant to rot and decay and provides strength and stability to handle whatever you're hauling.

(4) D-Rings

-Securely tie down your cargo with these heavy-duty anchor points, providing extra stability and safety during transport.

Stake Pockets and Rub Rail

-Enables you to customize the trailer's configuration to meet your specific hauling needs, and provide support and a more finished look to the trailer.
