Description

Need serious roll off capability without the bulk? This 2024 PJ Trailers Gooseneck Rollster 7 x 14 FT Roll Off Dump delivers a 13.26 cubic yard black powder coated dumpster bin on a heavy-duty gooseneck platform built for daily demolition, cleanup, and scrap work. The I-beam frame and Dexter axles with brakes on both axles give this trailer the backbone to handle heavy loads day after day.

A scissor lift system takes the effort out of loading and dumping, and the Smitty Built 17K winch provides extra pulling power for stubborn loads. Spring suspension paired with radial tires on 16 inch, 8 lug wheels keeps the ride stable under weight, and EZ lube hubs make routine maintenance quick. An all weather wiring harness keeps your lights working reliably no matter the job site conditions, and a locking tongue toolbox gives you secure storage right on the trailer.

The gooseneck design improves stability and maneuverability compared to a standard bumper pull, making this Rollster easier to back and position on tight job sites. With a GVWR of 15,680 lbs and a payload capacity of 11,595 lbs, this trailer is ready for serious work in a compact 14 ft package. Available now at \$13,999, contact Rock's Trailer Sales in Grove City today and reference Stock #84609 to schedule your inspection or reserve this PJ Trailers Rollster before it's gone.
