Price: $34,000.00

Description

A 270-degree swing-away mount for a truck loader leaf vacuum lets you pivot heavy debris collection equipment completely out of the way. This design enables easy access to truck tailgates and 1-man unloading operations without unmounting the engine.

Functionality & Use

Pivoting Range: Reaches up to a wide 270-degree swing arc to clear the entire rear truck bed or trailer gate. Swings from behind a dump trailer or mason dump body all the way to along the curbside where it is restrained in place allowing dumping of the leaves and debris without having to lift the heavy vacuum unit off.

Workflow Efficiency: Eliminates the physical strain of unbolting or unhitching heavy 9HP to 37 HP loaders when dumping.

Operation: Secured with heavy-duty locking pins or latches at designated stop angles (such as 90° and 180°) during transit or operation.

Initial installation requires welding the main pivot point securely to the curbside rear corner of the trailer. Once the main pivot point is installed it is 1 pin to remove and reinstall.

**Notes: This mount has been installed with up to 33 hp Scag Debris Loaders, and up to 37 hp Billy Goat Debris Loaders. The swivel is to be used only when the trailer is stationary, and the debris loader must be securely fastened when in travel mode or dumping mode. Further the dump trailer must have sufficient tongue weight to offset the added weight on the rear to avoid too low tongue weight which can lead to a wavering trailer. We sell the kit for $1,500.00 plus shipping. We install in our shop on both dump trailers we sell and other brands as well. Installation by appointment.
