Price: \$7,988.00

Description

Built for serious work and local conditions, these heavy-duty tilt deck trailers are locally built here in Oregon and engineered to handle demanding daily use. Each unit features a rugged frame-in-frame design with reinforced rectangular tubing for extra strength, stability, and long-term durability under heavy loads.

There are 3 trailers in stock right now, all set up with a 10,000 lb GVWR (10K) axle package, making them ideal for hauling equipment, vehicles, and heavy cargo. The simple, easy-to-use tilt latch allows fast, controlled loading and unloading without ramps, saving time on every job. Standard features include stake pockets, D-rings for secure tie-down points, and a front tool tray to keep straps and gear organized. Available lengths range from 14 to 22 feet, giving you flexibility for compact equipment or longer wheelbase vehicles.

For added versatility, these Oregon-built tilt decks can be outfitted with popular upgrades such as toolboxes, lockout valves, full rear bevel plates, and rub rails, so you can tailor your trailer to your exact hauling needs. Whether you're a contractor, landscaper, or equipment owner, these 10K tilt deck trailers deliver reliable performance and long-lasting value.

Located in Gresham, Oregon, Dayspring Auto & Trailers serves customers across the Portland metro and the Pacific Northwest, with local support, parts, and service to back your trailer purchase.
